SUMMARY

Systems Administrator with hands-on experience across Windows Server, VMware, Active Directory, and Azure VM infrastructure in 24x7x365 production environments. B.S. Computer Science; scripts in PowerShell, Bash, and Python. Runs a Proxmox home lab with a multi-DC Active Directory environment. AWS Certified Cloud Practitioner, pursuing Windows Server Administrator Associate (AZ-802).

SKILLS

- Systems & Virtualization: Windows Server, Active Directory, Group Policy, DNS, VMware (vSphere/vCenter), Proxmox VE, Linux, Docker
- Cloud & Scripting: Microsoft Azure, AWS (EC2, S3, IAM, Lambda), Cloudflare (Tunnel, Zero Trust), PowerShell, Bash, Python, SQL
- Monitoring & Diagnostics: SolarWinds, WMI/DCOM (Get-CimInstance, Get-WmiObject), RamMap, ServiceNow, Incident Management
- Identity, Access & Collaboration: Microsoft 365, Intune, CyberArk, RSA SecurID, MFA, Citrix, MobileIron, Jira, Agile

EXPERIENCE

Conduent

Sandy, UT

Windows Server Administrator

March 2026 – Present

- Monitor Windows Server and Azure VM infrastructure using SolarWinds and PowerShell across CPU, memory, disk, and network utilization, performing proactive remediation to prevent outages in a 24x7x365 environment
- Migrate virtual servers between VMware hosts to resolve resource over-utilization and maintain optimal performance
- Execute ServiceNow standard changes for server reboots and power-ons via vCenter and RDP, following change approval controls
- Administer Active Directory access via ADUC, provisioning AD groups and service accounts and processing Identity Governance Access (IGA) requests for audit compliance
- Support a FinOps cost optimization initiative by right-sizing CPU/RAM on underutilized servers, coordinating maintenance windows with stakeholders and DBA/application teams
- Host recurring cross-functional Disk Utilization Triage meetings and participate in Major Incident bridges within a 24x7x365 Global Command Center, coordinating escalation across infrastructure and business teams

Morgan Stanley

South Jordan, UT

Advisory Pod Technician (Level 1.5 Support)

August 2025 – March 2026

- Selected as 1 of 3 technicians for the Advisory Pod, delivering white-glove technical support to ~3,000 VIP and executive users via a direct-access line, bypassing the standard 150-member global desk
- Served as an escalation point with authority to assign work directly to deskside, infrastructure, and engineering teams, administering enterprise platforms (Microsoft 365, Citrix) during advanced, multi-day root-cause investigations

Service Desk Technician

April 2025 – August 2025

- Performed identity/access operations via CyberArk and RSA SecurID (AD password resets, token troubleshooting) and managed mobile device fleet enrollment and remote wipe via Intune and MobileIron

Geek Squad – Best Buy

South Salt Lake, UT

IT Consultant (Tier 1/Bench Support)

October 2024 – April 2025

- Diagnosed and repaired hardware/software issues for high-volume walk-in clients, mentoring junior technicians

C.R. England

West Valley City, UT

Software Developer Intern

June 2023 – August 2023

- Built the UI for an internal Health & Uptime Dashboard (React, TypeScript), helping IT teams identify system health issues 20% faster

PROJECTS

Home Lab

2026 – Present

- Built a Proxmox VE host on repurposed hardware, running Windows Server VMs on an isolated network bridge with NAT routing
- Deployed Active Directory Domain Services with two domain controllers and a member server as hands-on AZ-802 prep
- Secured remote access with Cloudflare Tunnel and Access (Zero Trust), with no inbound ports opened for management interfaces
- Run Linux containers (Docker photo gallery, browser-based VS Code, game server) and wrote a Bash DDNS updater on a systemd timer

EDUCATION & CERTIFICATIONS

Utah State University | B.S. Computer Science, Minor in Management Information Systems | Aug 2020 – May 2024

AWS Certified Cloud Practitioner (Jan 2025 – Jan 2028)

Microsoft Certified: Windows Server Administrator Associate (AZ-802), In Progress
